

COMPANY PRESENTATION

RELIABLE
PROGRESSIVE

Technological advance in detail

It is our mission to support you with high performance, high quality refuse collection vehicles and road sweepers day in day out. To be successful, we work relentlessly to improve our technologies and to optimise every detail. We rely on a consistent quality concept that is improved on an ongoing basis in this endeavour. This ensures a high level of reliability and low total cost of ownership (TCO).

That is what our products and services stand for. FAUN offers you a superior cost/benefit ratio. We are able to achieve this because we focus consistently on optimisation and high quality in research and development. Everything is aimed at making our products progressive, effective, economic, and reliable.

“FAUN relies on modern and accurate production.”

Efficiency and sustainability

in harmony

FAUN refuse collection vehicles and road sweepers are designed to offer long-term reliability, maximum efficiency and to work consistently all the time.

We offer a wide range of products to provide a tailor-made solution for each task. Our engineers and designers put innovations and high-tech systems on the road, from which you will benefit day to day and with which you will also be able to differentiate yourself from the competition – for

example, by sustainably reducing fuel consumption and emissions of hazardous materials and noise. We realise the issues of emissions and noise reduction in the ECOPOWER options.

As the customer, you can decide how environmentally friendly you want to design your fleet. FAUN also has been a leader in developing new drive technologies in the road sweeper segment for many years.

Road sweepers:

CITY

- VIAJET 4 Streamline
- VIAJET 5 Streamline

VARIO

- VIAJET 6 Streamline
- VIAJET 7 Streamline
- SYMPAJET

POWER

- VIAJET 8 Streamline
- VIAJET 12 Streamline

Special vehicles

- TERRAJET
- AQUATHERM
- FILTAIR

Refuse collection vehicles:

Rear loaders

- VARIOPRESS
- POWERPRESS
- SYMPAPRESS
- ROTOPRESS
- SELECTAPRESS

Front loaders

- FRONTPRESS

Transport

- ROTOPRESS XL

Side loaders

- SIDEPRESS
- SIDEPRESS MSTS

Front-side loaders

- EASYPRESS

Options

- ECOPOWER
- myFAUN telematic system
- Weighing systems

Consistent **innovations**

Continuous improvement is the guiding principle behind the further development of our products.

The focus here is always on you, the user, with quantum leaps such as the world's first diesel-electric hybrid refuse collection vehicle DUALPOWER, as well as in apparently conventional details. Such as consistently improved wear resistance, to reduce operating costs and increase the value of your investment. We save weight where it does not affect the stability and strong material thickness where high wear and rough operation require it.

The new ECOPOWER options allow you to choose which option best suits your strategy for saving energy. Minimising noise to minimise nuisance caused to your staff and residents while saving fuel, without losing out on performance – that makes sense and saves money.

Fraction-optimised compaction gives you the best usable capacity for each type of refuse collected while maintaining the permitted axle loads. Greater security with improved productivity and minimised wear are united and are no longer mutually exclusive.

Continuously improving what is good is not a pastime for our engineers but brings you tangible benefits.

The new Streamline generation of FAUN road sweepers already combine the unique FAUN air circulation system with revolutionarily improved air flow: the smaller and lighter VW-diesel engine allows the angled position of the fan directly in the air stream. The installation space that has become free is used for an additional water tank that also acts as an additional noise barrier between the fan and the driving position. The result does not just give you considerably improved suction performance and a greater range but also fuel savings, compliance with the most stringent emission standard and lower working noise.

The new V-shaped suction shaft also enhances suction performance and reduces wear: just one brush strip has to be changed and this is also more accessible. Your FAUN VIAJET Streamline needs less time for maintenance and sweeps better and for longer.

These are just a few examples. The total of many such innovative details ensures the maximum profitability for your investment in FAUN vehicles in the long term: **RELIABLE PROGRESSIVE.**

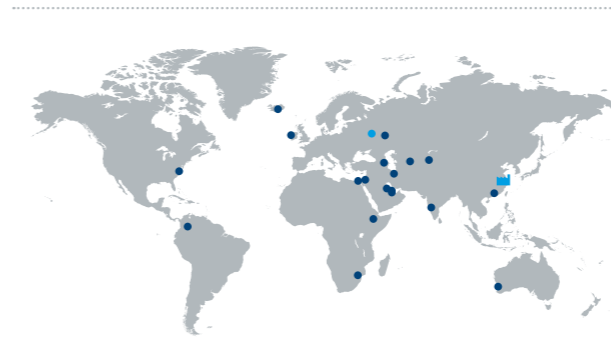

Strong network for the world

6 PRODUCTION SITES
WORLDWIDE

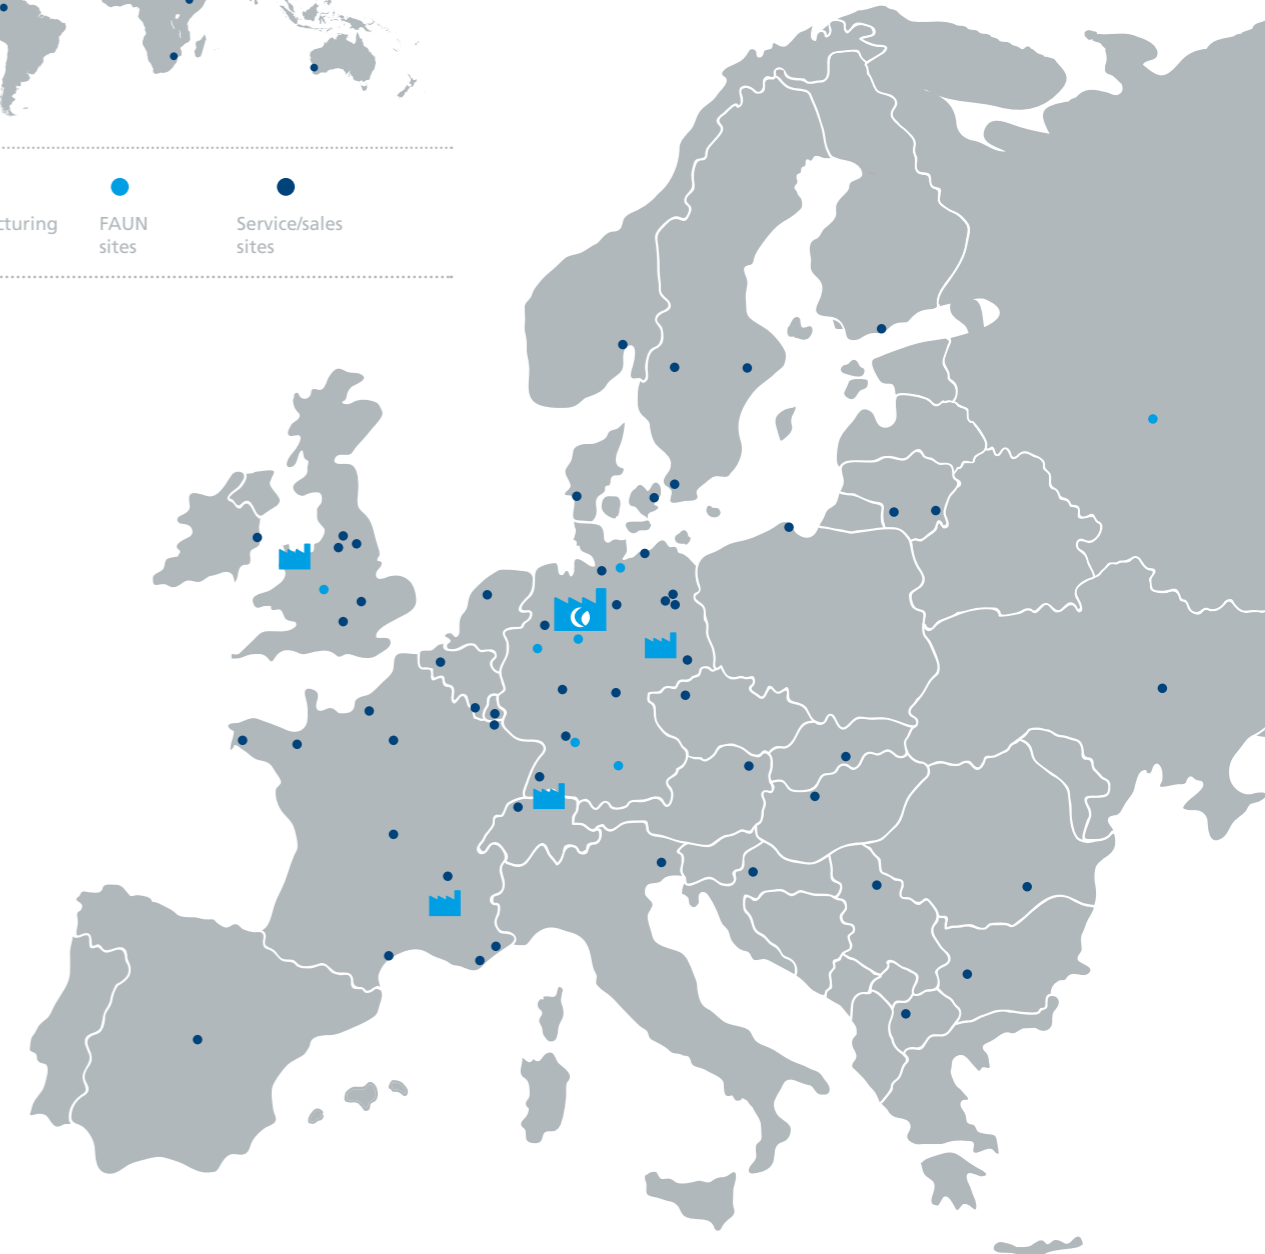

1,600 MUNICIPAL VEHICLES
ARE MANUFACTURED EVERY YEAR

1,000 STAFF

500 INTERNATIONAL
SERVICE PARTNERS

Manufacturing sites
FAUN sites
Service/sales sites

FAUN has developed to become the European market and technological leader for refuse collection vehicles and road sweepers. Developing and manufacturing products and solutions at six sites worldwide, we consistently stand for the latest technologies and high quality.

With 1000 employees we work tirelessly to meet the FAUN brand promise of RELIABLE PROGRESS consistently and worldwide. We supply our products via a comprehensive distribution network with 90 service and distributor sites on all continents. We are supported through 500 interna-

tional service partners. The FAUN standard is communicated through intensive training and close cooperation, and we maintain a global presence and are always available locally for our customers.

As part of the global KIRCHHOFF Group, our customers benefit from the synergies created by key technology and the transfer of expertise. As a family-run business, the KIRCHHOFF Group has focused on mobility for 229 years and stands for reliability in partnership.

“Made in Germany for the world:
FAUN vehicles are used worldwide.”

The benefit to you is a stable partner

FAUN provides strong products with a strong service. All in all, progress meets reliability here. With over 500 service engineers in the FAUN after sales services, we are right on your doorstep to keep your vehicles operational. Whether through repair, maintenance, inspection, or provision of original FAUN spare parts at short notice. We want you to benefit from our solutions to the full in the hard working

day. This is why we are reliably present for you when you need us. We also support you in every aspect of vehicle leasing, used vehicles and service concepts, with a complete range of further services offered by our FAUN Services GmbH. The services enable us to bring the maximum competitiveness and reliability to your FAUN fleet.

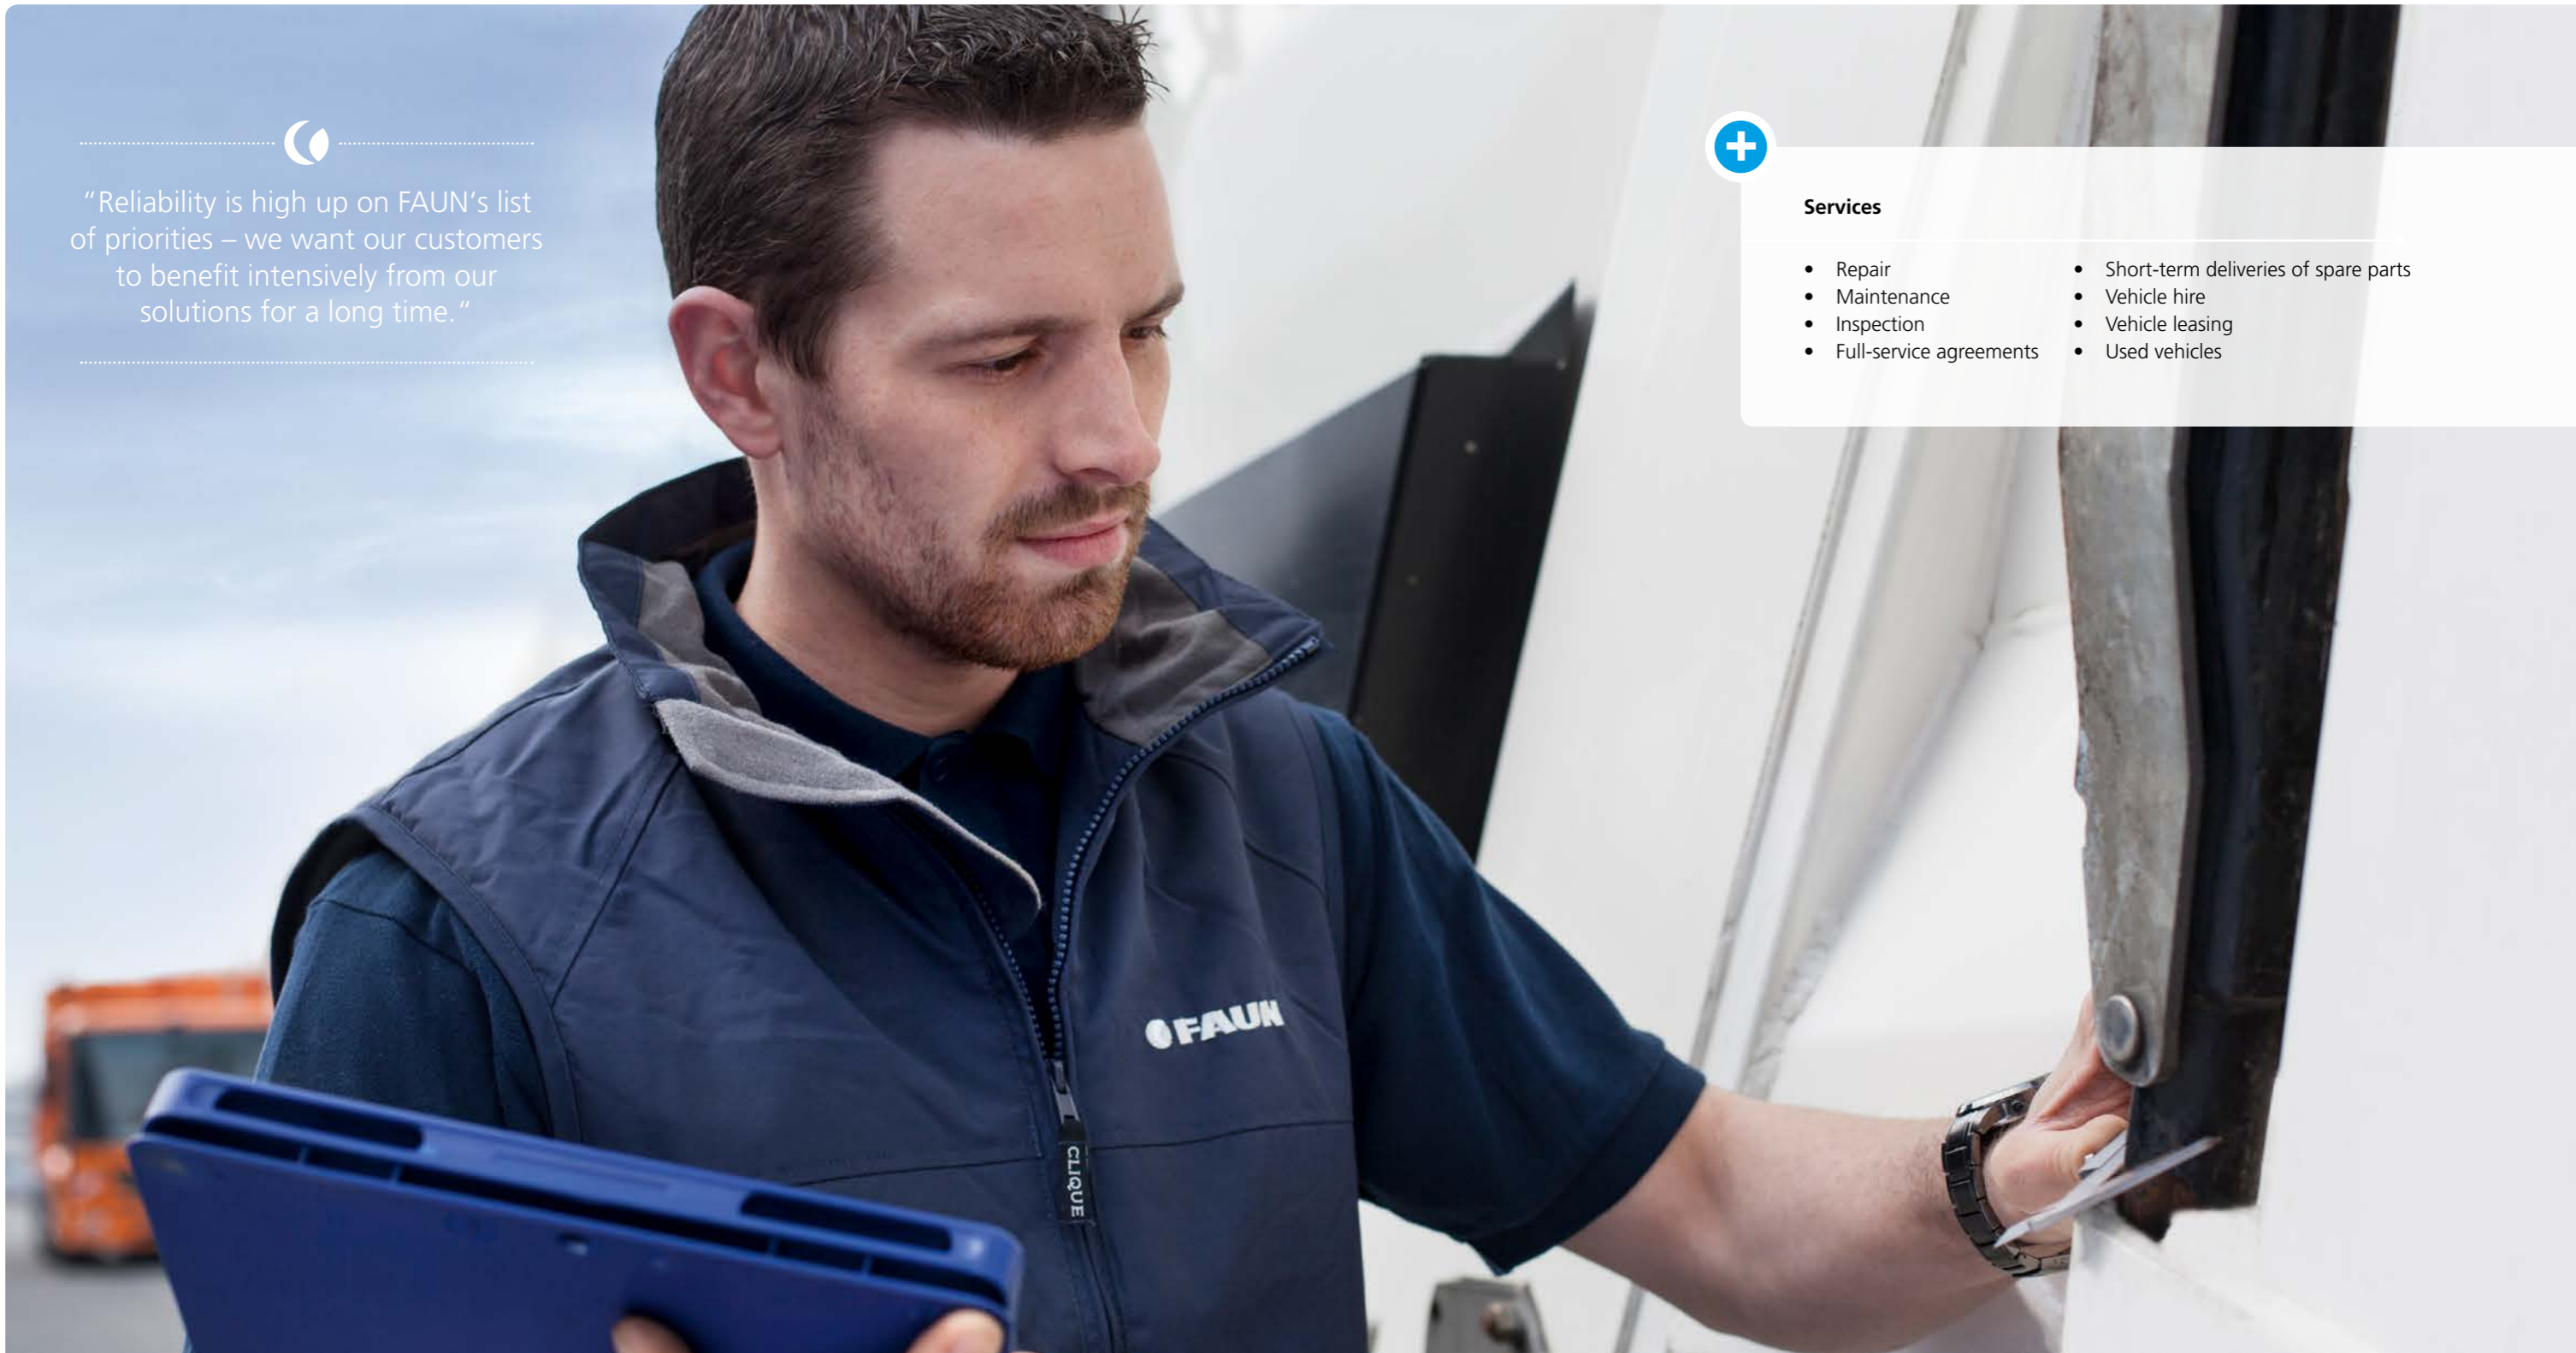

“Reliability is high up on FAUN’s list of priorities – we want our customers to benefit intensively from our solutions for a long time.”

Services

- Repair
- Maintenance
- Inspection
- Full-service agreements
- Short-term deliveries of spare parts
- Vehicle hire
- Vehicle leasing
- Used vehicles
